

Build with AI: Communications Kit

How to write better emails with AI in 4 steps

Hi, I'm Kainat!

Today we learn how to use AI
to write smarter messages
faster than ever before.

Extract Key Points

Draft with AI

Refine Fast

Used by 500+ students

Swipe to learn all 4 steps Scroll through all 12 slides!

What even IS a Communications Kit?

Think of it like having a writing partner available 24/7.

You give AI your document. It writes the perfect message for your audience.

- 1 You upload a document or paste your content**
- 2 AI pulls out the most important points for you**
- 3 AI drafts a tailored message for each stakeholder**
- 4 You refine it with one-click edits inside Canvas**

No writing degree needed. Gemini's free tier works great!

Lightbulb Moment This is kind of a big deal

3x

faster email drafting when AI knows your audience

Most people write one email and send it to everyone.

Different people care about completely different things.

Your CFO wants numbers. Your ops manager wants timelines.

AI learns both roles and writes each message differently.

That is your new superpower as a communicator.

Before AI vs After AI

What you need	Without AI	With AI
Write a team email	Same message for everyone	Tailored draft per stakeholder
Announce a project	You guess what to highlight	AI picks the right key points
Brief your manager	Long walls of text	Concise, role-specific bullets
Get sign-off faster	Back-and-forth rewrites	AI refines tone in one click

Which column are you living in right now?

Open Gemini, attach your document, then paste this prompt.

No document yet? Use any work report or meeting notes.

COPY-PASTE PROMPT

```
I'm a [your role, e.g. project manager] responsible  
for [the project] in the attached document.  
I'm writing [a piece of communication, e.g. an email]  
announcing [the topic] to [the audience].  
Pull [number] key points from the document  
that I can use in my message.
```

Best tools for this step:

Gemini

ChatGPT

Claude

Save Gemini's key points. You will use them in Step 2!

Pick Points for Each Stakeholder

Stay in the same chat. Ask AI to think about each person's role before picking what to highlight for them.

COPY-PASTE PROMPT

```
Select some points specifically for two key stakeholders: [stakeholder 1, e.g. our CFO] and [stakeholder 2, e.g. our ops manager]. Start by thinking about their priorities based on their roles before choosing the points.
```

Why this works so well:

CFO

Wants ROI, budget impact, and risk reduction

Ops Manager

Wants timelines, process steps, and resources

One prompt. Two perfectly targeted sets of points.

Draft the Email in Canvas

Switch to Canvas mode inside Gemini. This gives you a live document you can edit while Gemini helps you refine it.

COPY-PASTE PROMPT

```
Draft the email to [stakeholder 1, e.g. our CFO].  
Include the key points you selected for them  
as [format, e.g. bullet points].  
Keep it under 200 words and use a professional tone.
```

What Canvas lets you do:

Edit inline Click any part of the draft and change it yourself

Ask Gemini Highlight text and ask Gemini to fix just that part

Export to Docs Send to Google Docs to share with your team

Repeat for every stakeholder in just seconds!

Refine the Draft with Inline Edits

Highlight any part of the draft you want to change.
An 'Ask Gemini' box pops up. Type your edit request.

COPY-PASTE PROMPT

```
Make this [shorter / more formal / friendlier].  
Example: 'Make this shorter and more direct.'
```

Popular inline edit requests:

Make it shorter Removes filler, keeps the core message

Make it more formal Switches tone for executive audience

Add a clear CTA Tells the reader exactly what to do next

Simplify the jargon Makes it readable for non-technical people

One highlight. One prompt. A perfectly polished email.

Pro Tips to Get Even Better Results

Small habits that make a huge difference:

1

Give AI your role upfront

Say 'I'm a project manager' before anything else

2

Keep the chat open

Context from early messages makes later drafts better

3

Use Canvas for every draft

It's built for editing, not just reading

4

Try it with your other stakeholders

The more you practice, the faster you get

One consistent workflow beats 10 random AI chats.

See It in Action

Imagine you just finished a product launch report.

Here is how the 4-step workflow plays out in real life:

Step 1

Upload launch report, ask for 5 key points

Step 2

Ask AI: points for CFO vs points for Dev Lead

Step 3

Draft CFO email in Canvas with bullet format

Step 4

Highlight subject line, type 'make it punchier'

Result: Two polished, stakeholder-ready emails in under 10 minutes.

SAVE THIS

Your 4-Step Cheat Sheet

1

Extract Key Points

Attach your doc. Ask AI to pull the most important points.

2

Identify Stakeholder Points

Ask AI to think about each person's role before picking.

3

Draft in Canvas

Use Canvas mode to get a live, editable email draft.

4

Refine with Inline Edits

Highlight text and tell Gemini exactly what to change.

Pro tip: Use the same 4 steps for any announcement or update!

LAB TIME! Write Your First AI Email

1

Open Gemini and click New Chat

2

Attach a real work doc (or paste some text about a project)

3

Paste: "I'm a [role]. Pull 5 key points I can use in an email to [audience]."

4

Note the key points Gemini gives you

5

In the same chat, type: "Now pick points for [stakeholder name]."

6

From the tools menu, open Canvas and ask it to draft the email

7

Highlight your subject line and type: 'Make this punchier'
