

Hi there!

I'm Kainat and today we learn

Turn ANY Document into a Slide Deck in Seconds ■

No design skills. No hours wasted. Just one prompt.

◆ PROMPTS INSIDE

GeminiCanvas → SlideMagic ■

Does this sound familiar?

■ You have a 20-page report

■ Your audience won't read it

■ Building slides takes hours

■ Design is not your thing

Gemini Canvas fixes ALL of this ■

What is Gemini Canvas?

Think of it as your AI design partner

- Give it a doc or text
- It builds slides instantly
- You tweak with prompts
- Export to Google Slides or PDF

■ **No design skill needed at all!**

Before AI vs After AI

■ Before

Hours building slides

Manual formatting pain

Same doc, one audience

Re-read everything

Export a mess

■ With Gemini

Slides ready in seconds

Auto-formatted design

Instant version per audience

AI picks the key points

Clean Google Slides export

1

Build the Slide Deck

Upload your doc and ask Gemini Canvas to create slides.

COPY-PASTE PROMPT ■

Acting as an expert [designer / consultant],
help me create a text-only slide deck based
on [the document I have uploaded].

Always double-check for hallucinations ✓

2

Edit Your Slides

Just tell Gemini what to change. No Powerpoint needed.

■ Fix a missed detail

"You missed [detail] from source, add it to Slide [N]."

■ Change the tone

"Make the entire deck more enthusiastic and sales-focused."

■ Add a column to a table

"Add a column to Slide 5 table for [specific data]."

3

One Doc, Multiple Audiences

This is the superpower most people miss completely.

Clients

Sales-
focused,
visual

Team

Detailed,
technical

Students

Simple,
educational

PROMPT:

Change this deck to be for [new audience].
Use only the info already in the slides.

Where Can You Use This?

Works for ANY text-heavy document you already have

■ **Company policy doc** → onboarding slides

■ **Data-heavy report** → executive summary deck

■ **IT service overview** → client pitch

■ **Research paper** → class presentation

■ **Project update notes** → team standup deck

■ SAVE THIS

3-Step Cheat Sheet

1

Upload your doc

Click + in Gemini and add your file or Drive link

2

Pick Canvas + Paste Prompt

Turn on Canvas from the Toolbar ,then use the prompt

3

Edit and Export

Refine with follow-up prompts, then export to Slides or PDF

Pro Tips for Better Slides

Little things that make a big difference

■ Always verify facts

AI can miss details. Cross-check slides against your source doc.

■ Be specific in edits

Instead of "improve this", say "make Slide 3 more concise".

■ Name the audience first

Tell Gemini the audience before generating for sharper output.

■ Use Drive links

Uploading via Drive keeps formatting better than copy-paste.

LAB TIME!

Try it right now

Takes less than 5 minutes. Zero design needed.

- 1 Open Gemini and start a new chat
- 2 Upload any doc you have (policy, report, notes)
- 3 Click Tools bar and select Canvas
- 4 Paste this prompt:
- 5 Review, fix hallucinations, then export!

PROMPT:

Acting as an expert designer, create a text-only slide deck based on the document I have uploaded.

One Question For You

Which document do YOU want to turn into slides first?

A. A work report or policy doc

B. A research paper

C. My own project notes
