

Turn Raw Data Into a Story

How to get insights, charts and clear answers from any spreadsheet using AI

Hi, I'm Kainat!

Today we learn how to make AI read your data and explain it back to you, **no formulas needed.**

Find Patterns

Build Charts

Get the Why

Used by 500+ students

Swipe to learn all 3 steps · Scroll through all 12 slides!

What Does AI Actually Do With Your Data?

Think of it like hiring a data analyst who works in seconds.

You give AI your numbers. It finds the patterns, explains them in plain English, and even builds the chart for you.

- 1 You open or upload your spreadsheet**
- 2 AI scans every row and column for you**
- 3 It summarizes the key numbers in plain English**
- 4 It builds a chart you can use right away**

No coding or formulas required to get started

This Changes Everything

0

formulas you need to write for a first analysis

Most people stare at a spreadsheet and freeze.
AI turns those numbers into a story in seconds.

You stop guessing what your data means.
You start explaining it with confidence.

That's the real skill shift happening right now

Without AI vs With AI

What you need	Without AI	With AI
Data summary	Hours of scrolling rows	Done in seconds
Finding patterns	Easy to miss	AI spots it instantly
Explaining "why"	Just a guess	A clear, reasoned story
Visuals	Manual chart building	AI builds it for you

Which column matches how you work right now?

Get a Quick Data Summary

Open your spreadsheet in any AI tool and ask for the numbers that matter.

COPY-PASTE PROMPT

This data is from [source, e.g. my online store].

Give me the [first metric, e.g. total revenue] and [second metric, e.g. number of orders].

Best tools for this step:

Gemini

ChatGPT

Claude

Save this summary. You'll build on it in Step 2!

Ask One Smart Follow-Up

Use your summary to dig into one specific pattern.

- 1 **Open the same chat or sheet**
- 2 **Ask a focused question**
"What's my average order value by month?"
- 3 **Review the answer AI gives you**
- 4 **Save the finding, you'll use it next**

One good question beats ten vague ones

Turn It Into a Story

Now ask AI to explain the why, and show it visually.

COPY-PASTE PROMPT

You are a [data analyst]. For a [your business type], why might [your finding from Step 2] be happening?

Then create a [chart type] showing this trend.

Explains the why

Not just the number

Builds the chart

Ready to share

Ready for reports

No extra editing

Now you have a number, a reason, and a visual

Random Prompt vs Guided Prompt

Without Structure

- Vague, one-line questions
- AI guesses what you want
- Generic, surface-level answers
- You re-explain every time
- Charts you build by hand

VS

With Structure

- Clear, step-by-step prompts
- AI knows your exact data
- Specific, useful insights
- Builds on previous answers
- Charts AI builds for you

Works on: Gemini in Sheets | ChatGPT | Claude

Same data, completely different quality of insight

Best AI Tool for Each Step

*

Gemini

Best for working right inside Google Sheets, no exporting needed

*

ChatGPT

Best for deep explanations and building charts from any CSV file

*

Claude

Best for analyzing messy or large datasets clearly

*

Perplexity

Best for checking your numbers against real benchmarks

SAVE THIS

Your 3-Step Cheat Sheet

1

Get the Summary

Open your data in AI and ask for the key numbers

2

Ask One Question

Dig into a pattern with one focused question

3

Build the Story

Ask AI to explain why, then create a chart

Pro tip: Save one good prompt and reuse it on every dataset!

LAB TIME! Analyze Your First Dataset

1 Open a spreadsheet with your own data, or grab a sample online

2 Open it in your favorite AI tool

3 Paste the Step 1 prompt and review the summary

4 Ask one smart follow-up question from Step 2

5 Ask AI to explain the why and build a chart

6 Save your summary, finding, and chart for later

Share one insight your data revealed in the comments!

One Question For You

Which part of your data have you never been able to fully explain?

A My sales or revenue numbers

B My survey or feedback data

C My project or study progress

Comment A, B, or C below!

Or comment DATA if you want my prompt cheat sheet.
