4 Things You Will Walk Away With

Brainstorm product ideas with AI in minutes

01

Compare options using a cost-benefit table

02

Research industry trends without Googling for hours

03

Automate your research so it comes to you

04

Brainstorm with AI

Step 1

Pick a role, a product, and a goal. Then let AI generate creative ideas for you. Think of it as bouncing ideas off a colleague who never gets tired.

Try this prompt template:

"You are a [marketing expert] in the [skincare industry]. My company is launching a [new face serum]. Help me brainstorm [bundle ideas or add-ons] I could offer with this product."

Best AI tools for brainstorming:

ChatGPT

Claude

Gemini

Perplexity

Make a Cost-Benefit Table

Step 2

Once you have ideas, ask AI to compare them in a neat table. No spreadsheet needed, just ask!

Idea	Cost	Benefit	Pick it?
Travel pouch	Low	High	■ Yes!
Charging stand	Medium	High	■ Yes!
Premium case	High	Medium	■■ Maybe
Sticker pack	Low	Low	■ Skip

Pro tip:

Tell AI: "Sort these by highest benefit at lowest cost" and it will rank them for you automatically.

Research Trends in Seconds

Step 3

Stop guessing what's trending. Just ask AI. Give it context and it will pull relevant insights for your exact situation.

Ask AI this:
"What are current trends in [skincare] for 2025?
I am choosing product bundles for a new
face serum launch. Factor these trends into
your recommendation for me."

Sustainability is Big

Eco packaging and refillable options are winning customers right now.

Social Commerce

TikTok-worthy bundles outsell plain products by a wide margin.

Self-Care Wave

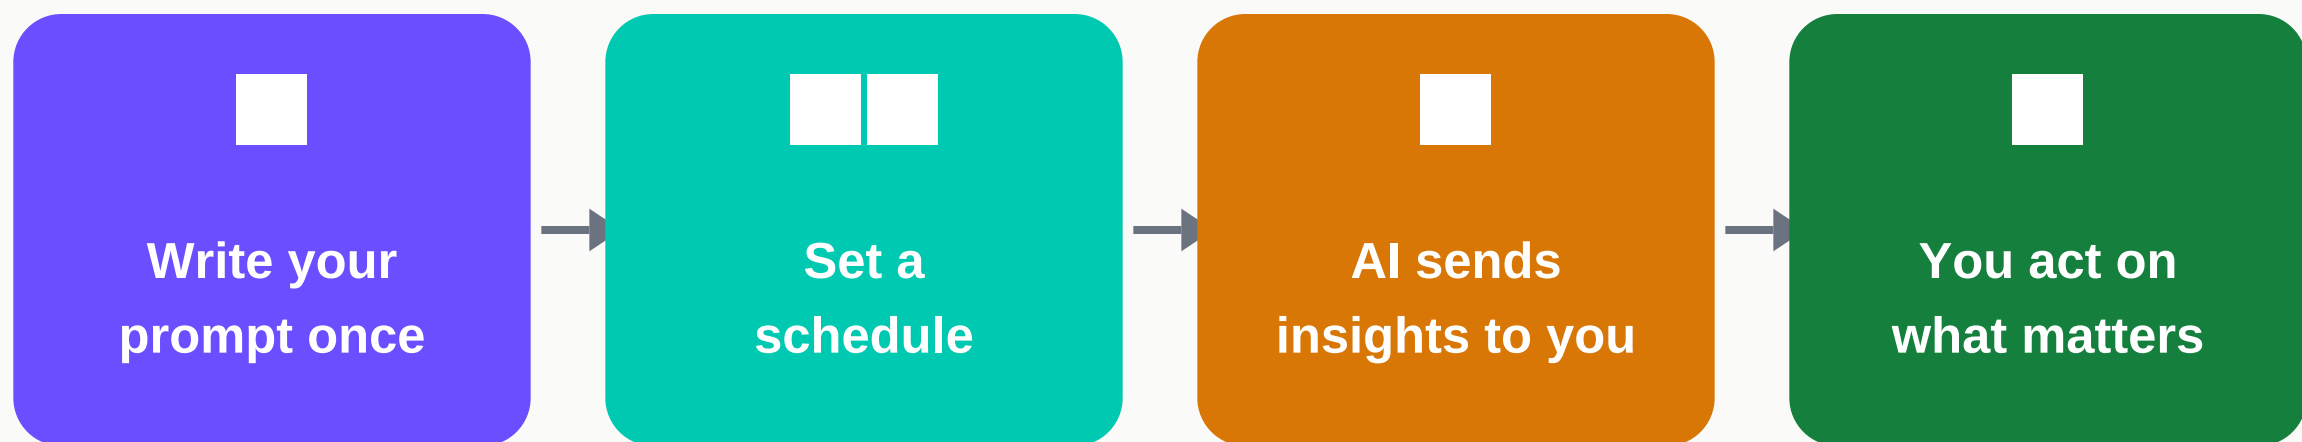

Wellness bundles consistently sell better than single items.

Automate Your Research

Step 4

Why manually Google trends every week when AI can bring them to you on a schedule?
Set it once and let it run.

AI tools that support scheduling + automation:

- **Gemini**
Scheduled Actions built in
- **Perplexity**
Weekly digest summaries
- **Make / Zapier**
Connect AI to any workflow

Think of it as your personal trend feed, curated entirely by AI.

Putting It All Together

(Premium Headphones Launch)

01

Brainstorm

Ask AI for bundle ideas. It suggests: travel pouch, charging stand, premium case, and sticker pack.

02

Analyze

Cost-benefit table shows travel pouch + charging stand give the highest ROI at low cost.

03

Research

AI finds that noise-cancelling tech + sustainable packaging are the top 2025 audio trends.

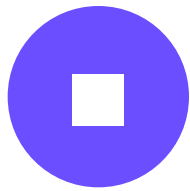

04

Automate

Schedule AI to deliver a weekly trend update every Monday so you stay ahead automatically.

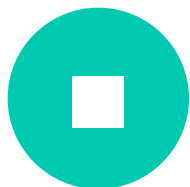

Pick the Right Tool for the Job

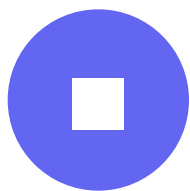

ChatGPT

Brainstorming, creative ideation, generating lots of ideas fast

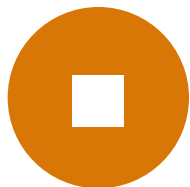

Perplexity

Real-time web research, trend reports, cited sources

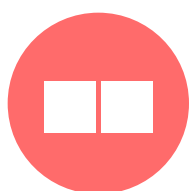

Claude

Deep analysis, summarising long docs, building comparison tables

Gemini

Scheduling research tasks, integrates with Google Workspace

Make / Zapier

Automating multi-step AI workflows end to end

Today in 60 Seconds

Brainstorm

Give AI a role, product and goal. Let it generate options for you.

Analyze

Ask for a cost-benefit table to spot the best choice quickly.

Research

Add industry context and let AI surface the top trends for you.

Automate

Schedule recurring research so the insights come to you.

AI speeds up the work. You still make the final call. That is the right balance.

Your Mini Practice Task

Put today's skills into action right now!

01

Pick any product (real or made up). Open any AI tool and brainstorm 5 bundle or add-on ideas.

02

Ask AI: "Make a cost-benefit table for these 5 ideas." Find the top pick.

03

Ask AI about 3 current trends in your product's industry. Does it change which idea you chose?

04

Bonus: Ask AI to run this same research for you every week. Does your tool support scheduling?

Drop your best idea or prompt in the comments!

Let's learn together!
