

DAY 07

Save for later

Spot Project Risks with AI

Hi, I'm Kainat!

Today we learn how to use AI
to catch project risks before they hit.

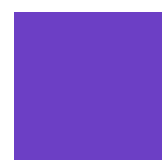

Find Hidden Gaps

Assess Risk

Update Timeline

Used by 500+ students

What even IS Risk Assessment?

**Spotting what could
go wrong** before it does.

Like proofreading a plan before you hit send.
Except it's your entire project on the line.

**AI can now read your project docs
and tell you what's missing.**

In seconds. Not hours.

LIGHTBULB MOMENT

Most project failures

**aren't from bad ideas.
They're from missing steps.**

Things nobody noticed until it was too late.

**AI reads your plan
and spots the gaps.**

Before the gaps spot you.

Before AI vs After AI

What you do	Before AI	After AI
Find gaps	Read docs manually (hours)	AI scans in seconds
Assess risk	Guesswork & experience	AI gives risk scores
Update timeline	Rebuild from scratch	AI suggests milestones
Catch mistakes	After they happen	Before they happen

Find What's Missing

Attach your project docs

(launch memo, schedule, brief)

Ask AI: What's missing?

COPY-PASTE PROMPT

You are a [project manager].
My team is launching a [product/service].
I've attached [doc 1] and [doc 2].
Are there any dependencies missing
from the plan?

Best tools: **ChatGPT** | **Claude** | **Gemini** | **Copilot**

All support document attachments

Assess the Risk Level

LOW

Minor delay

MEDIUM

Needs attention

HIGH

Project blocker

COPY-PASTE PROMPT

Let's focus on [missing dependency from AI's last reply].

How does it affect the overall [project goal, e.g. the launch]?

Tip: Keep the same chat! AI remembers context.

You build on each step automatically.

Update Your Timeline

Week 1

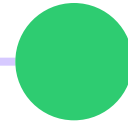

Identify gap

Week 2

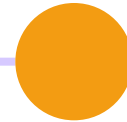

Assign owners

Week 3

Build buffer

Week 4

Review & go

COPY-PASTE PROMPT

Create a timeline with key milestones for [the missing dependency from the previous step].

Flag what might be missing from my current plan.

Best AI Tools for This

ChatGPT

Great at doc analysis &
detailed risk breakdowns

Claude

Best at reading long docs
& finding logic gaps

Gemini

Works directly with
Google Drive docs

Copilot

Great if you're already
in Microsoft 365

1

Upload your docs

Ask AI: What's missing?

2

Pick one gap

Ask AI: How does it affect the goal?

3

Build a timeline

Ask AI: Flag what's still missing.

Pro tip: Use the same AI chat for all 3 steps!

AI remembers context across the conversation.

LAB TIME!

Your Mini Practice Task

Step 1

Open any AI tool of your choice

Step 2

Attach a real or sample project doc

Step 3

Ask: What dependencies are missing?

Step 4

Follow up: How does this affect my launch?

Step 5

Ask for an updated milestone timeline

Share your output in the comments below!

Which AI tool did you use? Tell me!

One Question For You

**Which step do you think
would save YOUR project
the most time?**

A. Finding gaps

B. Assessing risk

C. Fixing the timeline

Comment A, B, or C below!

Or comment RISK if you want my full prompt pack.
